

Complete College Georgia

An eCore goal is to offer options for non-traditional students, military personnel, and professionals who may have difficulty taking classes by traditional means, yet desire to pursue a degree even when they have family and/or workplace responsibilities.

In support of our adult learners, the University System of Georgia partners with eCore to deliver complete online degree options for non-traditional students through our affiliate institutions. Such offerings include degrees in Criminal Justice, Political Science, Psychology, Criminology and Organizational Leadership.

Placing emphasis on providing advisement, flexibility, support and degree completion to both traditional and non-traditional students helps eCore ensure the success of all students.
