

eCore: The Strategies

Strategies and tools implemented by University System of Georgia's statewide collaboratives can address a wide range of barriers to the potential student, demonstrating true effectiveness in targeted populations. eCore strives to be a part of the solution to help streamline a quality education. Efforts require continual communication between eCore administration, Board of Regents, Adult Learning Consortium, and other players within the state.

As a statewide initiative, eCore is instrumental in taking important steps toward identifying and serving these targeted populations and partnering with other collaboratives to create seamless pathways by increasing the array of online options. (Georgia Higher Education Completion Plan, 2012)
